P-touch 2500PC

P-touch 2500PC

Tape widths up to 24 mm.

The P-touch 2500 supports a wide range of different tape and printing colours. Tapes are available in five widths – 6, 9, 12, 18, and 24 mm. In addition, two types of special application tapes are available: Security tape, which leaves a mark when removed, and Transfer tape, which can be ironed or sewn into fabric. The TZ tape range also includes a cost-effective non-laminated tape for use in applications that do not require the high durability provided by laminated tapes.

Creative Printing.

Vertical lettering, mirror-imaging, bold, italic or shadowing — these are just a few of the many creative fonts that can be combined as desired for dramatic special effects. Depending upon the width of the tape and the type size used, multi-line printing is also possible with the Brother P-touch 2500.

System Requirements.

LONG LIFE LABELLING

P-touch 2500PC

The labelling system for your PC. Outstanding Versatility.

The Brother P-touch 2500 is a compact graphic label printer that includes everything you need to print labels from your PC. All you have to do is install the accompanying software and connect the P-touch 2500 to your PC with the cable provided to access a full array of possibilities for creating your own labels. In addition to the built-in fonts and symbols in the installation software, you can also use all fonts and symbols supported by your PC. When it comes to creating labels, the Brother P-touch 2500 gives you outstanding versatility.

Durability.

P-touch labels not only look great, they also last longer too because Brother's patented system puts the lettering on the reverse side of the laminated tape. Plus P-touch labels are scratchproof, weatherproof, and they wipe clean.

P-touch labels can even withstand temperatures from –50°C to up to 200°C. And they're resistant to sunlight, moisture, wear and oil. For further technical details of Brother P-Touch Tapes visit our website @ http://www.brother.com.

For Windows 95, 98, NT.4.0 and Mac OS.

The Brother P-touch 2500 gives you an enlarged WYSIWYG display of your labels on your PC monitor to let you enter and position the tape width, text, numbers, graphic elements and symbols any way you like. The software that comes with the P-touch 2500 lets you create labels in a familar and user friendly way.

The Brother P-touch 2500 supports all commonly used bar codes, which makes it the perfect way to create professional-looking labels for use in distribution centres and retail outlets. The programme handles bar conversion and control numbers automatically.
